

Figure 1: 5D interaction energy scalar field (Red=attraction, Blue=repulsion, Green=free movement). The axes configuration is reported on the bottom left (the stretched axis corresponds to a rotational degree of freedom).

Figure 2: 5D interaction energy scalar field (Red=attraction, Blue=repulsion, Green=free movement). Same view as is figure 1 but highlighting only some of the energy components.

Figure 3: 5D interaction energy scalar field (Red=attraction, Blue=repulsion, Green=free movement). Same scalar field as in figure 1 but from a different view.
